

## US Representative, 4th District

# Jake Matthews

---

We are going to build a futuristic city in Oregon's 4th District. It will compete with Arizona's proposed "Telosa" city and Saudi Arabia's proposed "Neom" city. The job-creation alone will raise the per capita in Oregon's 4th District to well over \$100,000 from it's current \$24,000 (the poorest in our whole state).

I am introducing and passing bills in Congress that award contracts to the private-sector companies that propose the best vision of the city that will beat Telosa and Neom while achieving maximum fiscal responsibility and economic viability. Oregon will not be left out of this race.

We will also pass the Fairness Doctrine. In doing so, we will break the wheel of biased media from both sides, hold them accountable for reporting the truth and sue them when they engage in sensational journalism. Precedent for this is available in the Lou Dobbs FOX News case.

We will bring Congress into the 21st century regarding cybersecurity and malware attacks, the effects of which from abroad have already greatly weakened our nation. It has already compromised your cell phone as you read this. Make no mistake: World War III will be fought on our phones. Foreign nations know this and have been preparing themselves while our Congress and Intelligence community are severely behind and mired in infighting.

Term limits for politicians, no more dead cops, the dismantling of the Republican Party, subscription-living cities--our campaign will see Oregon's 4th pioneer the next frontier for America. Our movement starts here.

Why not Oregon?

Why not us?

**Vote Jake Matthews**
